DETAILED ACTION

Drawings

1. The drawings are objected to because the specification states that Figures 1 and 2 show chemical structures of the present invention comprising 2,6-pyridinedicarboxylic acid (see e.g. page 6, lines 21-26). However Figures 1 and 2 do not contain any 2,6-pyridinedicarboxylic acid based groups. Rather, the ligands illustrated in Figures 1 and 2 are based on isophthalic acid. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Objections

3. Claims 1 and 2 are objected to because of the following informalities: the terms "whereZ" and "apositive" in each claim should be replaced with --where Z-- and --a positive--. Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 1 and 2 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The claims are directed to a monolayer and thin film containing a metal complex between one metal atom and two substituted isophthalic acid molecules. However, the specification does not describe any manner by which monolayers or thin films of this complex can be made. Rather, the specification is

directed to metal complexes formed between metal atoms and substituted 2,6-pyridinedicarboxylic acid molecules.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

8. The formulas of claims 1 and 2 appear to illustrate coordination bonds between M^z and the carbon atom between the two carboxylic acid groups. It is not clear how the carbon atoms can form metal-coordination bonds since they have no free electron pairs.

9. Regarding claims 1 and 2, the phrase "such as" on the last line of each claim renders the claims indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).
